

BAYLIS™

next generation

My original windup radio pioneered a new eco technology that is as relevant and cutting edge today as it was 16 years ago.

A new generation has grown up with many electronic devices that were inconceivable when I created my radio.

Now we have developed a range of products that combine the best of these modern ideas with the freedom and energy efficiency of windup technology.

Welcome to the next generation.

Trevor Baylis OBE

A handwritten signature in white ink that reads "Trevor Baylis".

- ebook viewer
- hi-fi recorder
- memo recorder
- data storage

dual power charge
USB or eco-windup

Eco Media Player
EMP-MX71

power

windup
USB

The eco windup system means that you never need to worry about running out of power or wasting environmentally harmful batteries.

One minute of winding gives up to 40 minutes of play time so it's ideal for the beach or long weekends in the country - you can even use it to charge your mobile phone in an emergency!

Alternatively, you can still charge the media player conventionally through the USB port of your computer.

media

music
video
radio

Watch your favourite movies and music videos on the bright full colour screen.

Listen to the music and movie soundtrack on the superb sound system or tune into your favourite programmes on the FM stereo radio.

View your photo albums and read ebooks - any time, any place. With or without power!

storage

internal memory
SD card

You can store all your media and data onto the massive internal memory, and even more with plug in SD cards.

When connected to your computer the device will appear as an external disk drive so you can easily "drag and drop" all your favourite media files.

Transform your large record collection into a palm-sized format by using this device to record from old cassette and record players. Use the built in microphone to record voice memos or whatever is going on around you.

SPECIFICATIONS:

Eco Media Player
EMP-MX71

DESIGNED IN THE UK

DUAL Power System

Internal Lithium Ion battery can be recharged fully via PC/Laptop USB port, or internal ECO-Dynamo system which provides approx 40 minutes audio play time for each 1 minute of winding.

Max Play Time: 20 Hours.

PHONE Charger

Emergency charge for popular mobile phones.

Simply connect phone to *EP-MX71* with the provided connector and wind the generator to charge phone.

SUPER-Bright Torch

High intensity latest technology LED

AUDIO Stereo System

Super Hi-Fi audio reproduction of:-
mp3, wma, asf, wav, ogg.

Stereo 3.5mm headphones jack.

High quality headphones included.
