

i-active

Thermoelectric mini eco fridge Mains and 12 Volt powered

Enjoy cold drinks and food anywhere anytime with the i-active portable thermoelectric mini fridge.

Kind to the environment – no refrigerant used at all, and only an average of 33 Watts of electricity. The i-active mini eco fridge is one of the most energy efficient portable fridges available today.

Includes Mains charger and 12 Volt car cigar adapter charger.

Stylishly designed to look good anywhere, the mini eco fridge is ideal for picnics, beach, boat, garden, BBQs, students, in fact anywhere that you need a compact, portable fridge.

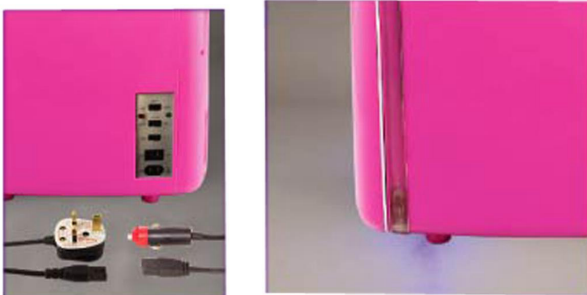

Not only does the mini eco fridge chill drinks and food, at the flick of a switch it reverses its cooling capacity to become a portable oven! Capable of heating food to 65 degrees Celsius.

6 Litre capacity, but still small enough to be portable

Technical details

Capacity	6 Litres
DC Voltage	12 V DC
Mains Voltage	220 – 240 V AC
Power Consumption AC	36 to 44 Watts
Power Consumption DC	30 to 33 Watts
Cooling capability	15 to 17 degrees C below ambient
Heating capability	65 degrees C max
Cooling and heating technology	Peltier effect thermoelectric chips
Accessories included	Mains lead and plug + 12 VDC car and boat charger
Certificates	CE, Rosh, GS
Dimensions	375 (H) x 210 (W) x 280 (D) mm
Weight	3.25 Kg

Mains or 12V DC power Selectable LED illumination
