## Flickering effect SOLAR CANDLE

**POWERplus**  
HOME & GARDEN

POWERplus introduces to the Home & Garden line, the Dragonfly, a solar powered candlelight with flickering effect.

For charging by solar energy, just flip the candlelight and the integrated solar cell in the base of the light will charge the internal battery. Flip the candlelight to its normal position, and the candlelight will automatically turn on with a realistic flickering candle effect. It really looks like a real candle. Use indoors or outdoors, perfectly safe – even for children.

Charge during daytime
