Energy Meter

Energy Meter

EcoSavers® Energy Meter

The EcoSavers® Energy Meter is a high specification plug in meter which can accurately measure the energy consumption of an electrical appliance.

Using this Energy Meter enables any electrical product to be accurately measured for current consumption and display the cost of running the appliance.

Using the EcoSavers® Energy Meter the user can identify high energy applications and their associated cost to run and decide where to save energy and money.

SPECIFICATIONS

Voltage display	100V – 240V
Current display	0 – 16A
Energy consumption display	0.2W – 3.600W
Display operating time	hours / min. / sec.
Display costs of energy	in £
Maximum consumption	16A
