EcoSavers® EL Technology Nightlight

The EcoSavers® Nightlight utilises new EL(Electroluminescent) light technology which guarantees a soft and friendly light with only 0.18W power consumption. That's a staggering 500 times less energy than a conventional light bulb. This nightlight provides a gentle, friendly pale green light. Ideal for passageways, staircases, landings and children's bedrooms. You and your children will feel comfortable and safe at night.

Simply plug the nightlight into a mains socket and experience the gentle light of the EL-technology. A cool touch, smooth pale green glow that comforts and guides anyone during the darkest of nights. The automatic light sensor will switch on the nightlight when it is getting dark and switch off automatically at daylight.

Enjoy the gentle light of the EcoSavers® Nightlight at only a fraction of the cost of running a conventional light. Help save the planet and your pocket.
