SOLAR POWER UNIVERSAL TV REMOTE CONTROL

LEOPARD

The POWERplus® Leopard Solar Power Universal TV REMOTE CONTROL

Empty batteries in your remote control?
Do you recognise this situation? It's a common
problem.

POWERplus® introduces the Leopard,
A new technology solar powered TV remote control.
By using the latest solar technology the solar cell of
the Leopard can even be charged inside without direct
sunlight. Daylight or artificial light is enough to charge
this remote control.

Save batteries – save the environment and money.

The Leopard is a universal TV remote control which is
very easy to program
Just select your TV model corresponding with a
number on the remote control and after a few seconds
the solar remote control is ready.
Programming was never easier !

Integrated Solar Panel

1 button easy programming

Lightweight and comfortable grip
